Major Events																																					
1		System Requirements Review						30	25			10/5/2019																									
2		Concept Design Review						0	30									11/5/2019																			
3		Preliminary Design Review						0															12/3/2019														
Accomplishments & Criteria																																					
1	Sound Level Data Collection							15	45																												
	1.1	Measurement Collection						5	15																												
	1.2	MATLAB plot of threshold char.						10	15																												
	1.3	Threshold testing w/ module						0	15																												
2	Electronics Design							26	63																												
	2.1	Initial Decision on Components						14	15																												
	2.2	Analog integ. uC w/ mic						3	12																												
	2.3	Setting integration w/ uC						3	10																												
	2.4	Digipot int w/ uC and Audio						3	10																												
	2.5	Full module integration, testing						3	8																												
	2.6	PCB Enclosure							8																												
3	Microcontroller Programming							0	57																												
	3.1	Initial & Theoretical Code Outline							10																												
	3.2	Integration of Mic w/ uC							12																												
	3.3	Setting integration w/ uC							10																												
	3.4	Integration of digipots, audio, uC							10																												
	3.5	Full module integration, debug							15																												
4	Preparation for Presentation, Write-ups							80	80																												
	4.1	SRR Powerpoint						20	20																												
	4.2	SRR Write-up						20	20																												
	4.3	CBR Powerpoint						20	20																												
	4.4	CBR Write-up contribution						20	20																												
	4.5	PDR Powerpoint																																			
	4.6	PDR Write-up
